Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well—planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staP together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quaJerly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: **A** compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra—curricular activities to achieve the learning outcomes of the program.

Academic Program Description Form

University Name: ....

Faculty/Institute: ....

Scientific Department: ....

Academic or Professional Program Name: ....

Final Certificate Name: ....

Academic System: ············

1. Program Vision

Program vision is written here as stated in the university's catalogue and website.

2. Program Mission

Program mission is written here as stated in the university's catalogue and website.

3. Program Objectives

General statements describing what the program or institution intends to achieve.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

6 Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews•
Institution Requirements				
College Requirements				

Department Requirements				
Summer Training				
Other				

This can include notes whether the course is basic or optional.

7. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
			theoretical	practical

8. Expected learning outcomes of the program

Knowledge

Learning Outcomes 1	Learning Outcomes Statement 1

Skills

Learning Outcomes 2	Learning Outcomes Statement 2
Learning Outcomes 3	Learning Outcomes Statement 3

Ethics

Learning Outcomes 4	Learning Outcomes Statement 4
Learning Outcomes 5	Learning Outcomes Statement 5

9. Teaching and Learning Strategies

Teaching and learning strategies and methods adopted in the implementation of the program in general.

10. Evaluation methods

Implemented at all stages of the program in general.

11. Faculty

Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	**Lecturer**

Professional Development

Mentoring new faculty members
Briefly describes the process used to mentor new, visiting, full—time, and part—time faculty at the institution and department level.
Professional development of faculty members
Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

12.   Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

13.   The most important sources of information about the program

State briefly the sources of information about the program.

14.   Program Development Plan

Program Skills Outline																
				Required program Learning outcomes												
Year/Level	Course Code	Course Name	Basic or optional	Knowledge				Skills				Ethics			
				A1	A2	A3	A4	B1	B2	B3	B4	C1	C2	C3	C4

- **Please tick the boxes corresponding to the individual program learning outcomes under evaluation.**

Course Description Form

1. Course Name:
Functional analysis 2

2. Course Code:
elective

3. Semester / Year:
Fourth stage, second semester

4. Description Preparation Date:
28-3-2024

5. Available Attendance Forms:
Attendance

6. Number of Credit Hours (Total) / Number of Units (Total)
60 hours

7. Course administrator's name (mention all, if more than one name)
Name: Prof. Dr. Laith K. Shaakir Email: dr.laithkhaleel@tu.edu.iq

8. Course Objectives

Functional analysis aims to introduce the student to the concepts of: quotient spaces, the space of linear functions, the space of continuous linear functions, bounded linear functions, Hahn-Benach's theorem, Hilbert spaces, orthogonality, orthonormal sets, orthonormal basis, weak convergence, Rice's representation, adjoint operators, and projections.	• ..... • ..... • .....

9. Teaching and Learning Strategies

Strategy	

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	the concept of Quotient spaces with some theorems	Quotient spaces	Lectures	Discussion and tests
2	4	Linear functions	The space of linear functions	Lectures	Discussion and tests
3	4	continuous linear functions with some theorems	continuous linear functions	Lectures	Discussion and tests

4	4	Bounded linear functions with some theorems	Bounded linear functions	Lectures	Discussion and tests
5	4	Study the space of bounded linear functions	the space of bounded linear functions	Lectures	Discussion and tests
6	4	Hahn –Banach theorm with some results	Hahn –Banach theorm	Lectures	Discussion and tests
7	4	Pre-Inner product spaces with some examples	Pre-Inner product spaces	Lectures	Discussion and tests
8	4	Hilbert space with examples and theorems	Hilbert space	Lectures	Discussion and tests
9	4	Orthogonal ses with examples and theorems	orthogonality	Lectures	Discussion and tests
10	4	Orthonormal sets with examples and theorems	Orthonormal sets	Lectures	Discussion and tests
11	4	orthonormal basis with examples	orthonormal basis	Lectures	Discussion and tests
12	4	Riesz theorem	Riesz representation	Lectures	Discussion and tests
13	4	the concept of Weakly converge	Weakly converge	Lectures	Discussion and tests
14	4	Adjoint operators	Adjoint operators	Lectures	Discussion and tests
15	4	projections	projections	Lectures	Discussion and tests

11. Course Evaluation	
Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports …etc	

12. Learning and Teaching Resouces	
Required textbooks (curricular books, if any)	مقدمة في التحليل الدالي,نوري فرحان المياحي و علي حسين بتور, 2005
Main references(sources)	1- **Introductory Functional Analysis With Applications "Kreyszig1978 ,** 2- **Introduction To Functional Analysis " by Sharma J.Vasishtha A.R, 1975**
Reconnended books and references (scientific journals, reports,…)
