Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

Academic Program and Course Description Guide

Introduction:

The educational program is a well—planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staP together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quaJerly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

1

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

<u>Academic Program Description:</u> The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description:</u> Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision</u>: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission</u>: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra—curricular activities to achieve the learning outcomes of the program.

1. Program Vision

Program vision is written here as stated in the university's catalogue and website.

2. Program Mission

Program mission is written here as stated in the university's catalogue and website.

3. Program Objectives

General statements describing what the program or institution intends to achieve.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

6 Program Structure

| Program Structure | Number of | Credit hours | Percentage | Reviews• |
|-------------------|-----------|--------------|------------|----------|
| | Courses | | | |
| Institution | | | | |
| Requirements | | | | |
| College | | | | |
| Requirements | | | | |

Attendance

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours

7. Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Nazar K. Hussein Email: <u>nazar.dikhil@tu.edu.iq</u>

8. Course Objectives

| | • | | | | | | |
|--------------------|--|---|--|--|--|--|--|
| 1. Introducing th | e student to the concepts and principles of | | | | | | |
| mathematics and | l its applications in various fields. | | | | | | |
| 2. Develop a stro | ong understanding of food groups, their | ••••• | | | | | |
| characteristics, a | nd how they differ from conservative | | | | | | |
| cultural groups. | | ••••• | | | | | |
| 3. Explore differ | ent types of mathematics. | | | | | | |
| 4. Providing pra | ctical experience in designing mathematics | | | | | | |
| concepts using d | levelopment tools and programming | | | | | | |
| languages. | | | | | | | |
| 5. Attractive to t | he analysis and analysis of mathematics | | | | | | |
| issues in terms o | f accuracy, interpretability and expertise. | | | | | | |
| 6. Improve critic | cal and problem-solving skills by applying | | | | | | |
| positive mathem | atics techniques to search for solutions in a | | | | | | |
| real world chara | cterized by uncertainty and ambiguity. | | | | | | |
| Encourage and c | liscuss advanced topics in the Dawadi | | | | | | |
| project, such as | design controls, blur recognition, and blur | | | | | | |
| recognition. | | | | | | | |
| 9. Teach | ning and Learning Strategies | | | | | | |
| Strategy | There are several strategies that can be used in the learning and | | | | | | |
| | teaching process of mathematical modeling. Here are some effective | | | | | | |
| | strategies: | | | | | | |
| | 1. Active learning: It requires st | udents to actively participate in the | | | | | |
| | 1. Then to rearing. It requires se | addition to delivery participate in the | | | | | |

Interactive activities such as real-world applications can be organized and solved through fuzzy mathematics.

2. Practical application: Learning in fuzzy mathematics should be related to its practical applications. Real-life problems and challenges can be presented for students to solve using fuzzy mathematics. This allows students to see the value and importance of the material they are learning in everyday life.

3. Cooperative learning: Students can be encouraged to work together in small groups to solve modeling problems. They can exchange knowledge, ideas and experiences, enhance their common understanding and develop communication and collaboration skills. Use of technology: Available technological tools and programs can be used to enhance the learning process and analyze fuzzy models.

10. Course Structure

| Week | Hours | Required Learning | Unit or subject | Learning | Evaluation |
|------|-------|---|---|----------|----------------------|
| | | Outcomes | name | method | method |
| 1 | 4 | General introduction to fuzzy mathematics | General introduction | Lectures | Discussion and tests |
| 2 | 4 | The difference between classical logic and fuzzy logic | General introduction | Lectures | Discussion and tests |
| 3 | 4 | Representation of affiliation functions | Affiliation functions | Lectures | Discussion and tests |
| 4 | 4 | Trigonometric function, trapezoid function, and Gaussian function | Affiliation functions | Lectures | Discussion and tests |
| 5 | 4 | Operations on fuzzy sets | Operations on groups | Lectures | Discussion and tests |
| 6 | 4 | Linguistic variables | Linguistic variables | Lectures | Discussion and tests |
| 7 | 4 | Characteristics of fuzzy groups | Characteristics of fuzzy groups | Lectures | Discussion and tests |
| 8 | 4 | Fuzzy relationship | Fuzzy relationship | Lectures | Discussion and tests |
| 9 | 4 | Mid-course exam | Mid-course exam | Lectures | Discussion and tests |
| 10 | 4 | Methods of representing fuzzy relationships | Methods of representing fuzzy relationships | Lectures | Discussion and tests |
| 11 | 4 | Operations on Matrices | Operations on Matrices | Lectures | Discussion and tests |
| 12 | 4 | Characteristics of fuzzy relationships | Characteristics of fuzzy relationships | Lectures | Discussion and tests |
| 13 | 4 | Installation of the relationship in pieces- α – cut | Installation of the relationship in pieces- αcut | Lectures | Discussion and tests |
